ABOUT ME

My name is Biruk Wubshet, a graduate of Architecture from Ambo University (2020–2025). Over the past five years, I have gained extensive experience through academic project internships, and freelance work. This journey has strengthened my design skills, project coordination abilities, and adaptability in real-world settings. With a solid foundation in both theory and practice, I am prepared to contribute meaningfully to the evolving field of architecture.

The design integrates residential units with a vibrant marketplace, fostering a synergistic relationship where residents have access to essential services and local businesses benefit from a built-in customer base. It's a strategic intervention designed to bridge the gap between affordable housing and economic opportunity.

In this project, my responsibilities included designing site circulation roads, landscape elements, and the site gates, alongside addressing various aesthetic aspects. Working collaboratively with my partner, Daniel Ayele, we aimed to create a functional and visually cohesive environment that met both client needs and site conditions.

STATUS- UNDER CONSTRUCTION

During my internship, I was involved in a client-initiated redesign project that encompassed the entire façade of a residential building. In addition to the architectural façade treatment, I contributed to the design of the surrounding landscape and the main entrance gate. This experience allowed me to engage with real-world design challenges and deliver cohesive solutions that balanced aesthetics, function, and client expectations.

STATUS- UNDER CONSTRUCTION
PROGRAMS-CLASS ROOM
- ART GALLERY

The interior design for this architectural school classroom, which doubles as an art gallery, aims to blend functionality, inspiration, and comfort in a unified learning and exhibition environment.

The layout is both flexible and efficient, encouraging creativity, collaboration, and critical thinking while also providing a professional setting for art display and appreciation.

A peaceful, minimalist retreat designed for rest and relaxation. The space features a low-profile bed, warm lighting, and a natural material palette with wood, soft textiles, and muted tones. A built-in wardrobe, clean lines, and clutter-free surfaces enhance comfort and clarity.

Large windows or soft lighting create a calm, airy atmosphere making the room both functional and serene.

PROJECTS ARCHITECTURAL

As an architect our school of thought focuses on our creativity and problem solving by creative design outlets. My field gives me an advantage in this world as it thought me the basic principles of design and how those should be presented in a manner that can interact with the masses.

all of the following outlets are designed and presented in such manner.

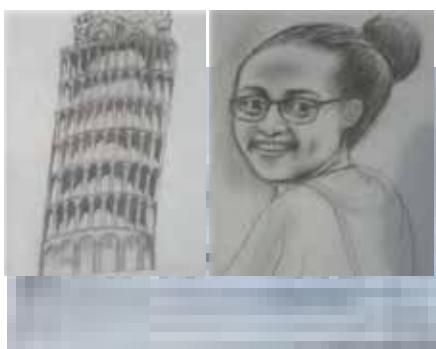

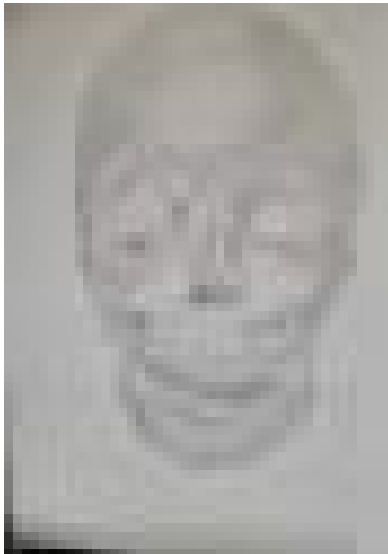

In the next few pages i have showcased my works across.

I have done many works ranging from Logo design to packaging and also include UI/UX design.
